TO OU 3 ADMINISTRATIVE RECORD

RE Review of Administrative Record for Completeness

On April 9 1997, I spoke with Gary Kleeman of USEPA Region VIII and Carl Spreng of CDPHE regarding the completeness of the OU 3 administrative record. I had previously sent them my assessment of the record, and the recent documents that did not appear in the administrative record index, and which needed to be included. Gary asked that six additional documents be included:

- 1) An October 1984 report by the Cities of Thornton and Westminster, entitled "Evaluation of Impact of Metals on Standley Lake",
- 2) A September 27, 1988, presentation by Rick Lawton of Rockwell International, entitled "Offsite Soil Sampling and Remedial Action on Lands East of Indiana",
- 3) A September 1, 1995, letter from Joe Schieffelin, CDPHE, to Steve Slaten, DOE/RFFO, regarding the letter report for the CDPHE conservative risk screen,
- 4) A January 5, 1996, letter from Steve Slaten to Joe Schieffelin and Susan Chaki, CDPHE, transmitting the Revised Draft Final Proposed Plan for OU 3,
- 5) A December 27, 1995, letter from Susan Chaki to Steve Slaten, transmitting comments on the Draft RFI/RI Report for OU 3, and,
- 6) A June 7, 1996, letter from John Rampe, DOE/RFFO, to Susan Chaki, responding to CDPHE staff comments on the Draft RFI/RI Report for OU 3.

Gary stated that, with the inclusion of the aforementioned documents and the additions suggested in my correspondence, EPA considered the OU 3 administrative record to be complete. These items have been received from EPA and are being entered this date into the administrative record.
